Fraser Essentials Gentle Shampoo & Conditioner: this line is safe for all ages, stages, shapes and sizes! This is a versatile line that is perfect for your senior dog and your baby puppy. The Gentle Shampoo & Conditioner line is also great for dogs with sensitive skin or skin prone to irritation. As always, no parabens, sulfate, or silicone. This line has no artificial color or fragrance added. Gentle Shampoo & Conditioner is a great choice for owners who have trouble with their own allergies and skin irritation even using the mildest product lines for their dogs. Some ingredients include soothing Aloe Vera and Rosehips Oils.

Fraser Essentials Brushing Spray: this spray can be used on wet or dry coats and will assist in loosening and preventing irritating knots while moisturizing and restoring. It is comprised of a unique blend of essential oils - Lavender Oil, Lemon Cold Pressed Oil, Pine Oil, Australian Sandalwood Oils - that won't build up on the coat. Brushing Spray makes for easier combing, controls static, detangles and leaves that incredible shine! Brushing Spray is not only my favorite Fraser Essentials product but my favorite product OF ANY on the market. It is absolutely incredible.

Fraser Essentials Squeaky Clean Shampoo & Conditioner: the perfect shampoo for dogs that like to get their paws dirty! It is great for dogs that enjoy playing in the mud, running on the beach with the sand in their hair, or swimming in the pool. It will get your Papillon mud free, smelling fresh and CLEAN! This line is full of essential oils with antibacterial and antiseptic qualities to gently cleanse while leaving a bright shine and fresh smell! It can also be used on dogs prone to irritation and itchy skin. This shampoo also doubles as a fabulous Clarifying shampoo to remove any oil or dirt.

Fraser Essentials Nurturing Shampoo: this shampoo is designed to nourish, moisturize, and care for the coat with particular ingredients selected to strengthen, protect, and increase elasticity of the coat. Some of those products include Hydrolyzed Rice Protein which helps to prevent damage and nourish the coat while Keratin Amino Acids assists in improving the condition of the coat and providing shine. It is an effective cleansing shampoo that will not dry or strip the coat. It is also a great addition to your routine to help prevent matting. This shampoo pairs well with others in the Fraser Essentials Range such as Classic White Shampoo.

Fraser Essentials Classic White Shampoo: specifically designed for parti-colored dogs (like Papillons!) as it contains no bleaching agents. This product will naturally brighten and whiten your Papillon! The base to this line nourishes the coat to avoid the dryness often caused by other harsh whitening products. These products contain Protein, Keratin and amino acids as well as healthy fruit extracts. Tip: For stubborn stains, apply directly to the stain and let sit for 3-5 minutes before rinsing well!

Fraser Essentials Shine Bright Conditioner: the ONLY product you will need to bring shine to a dull lifeless coat. It is a mild conditioner designed for dull lifeless coats that require added shine. It is rich in Lime Cold Pressed Essential Oil which provides a fresh scent and adds vitality to the coat. Fraser Essentials Shine Bright Conditioner is Paraben, Sulphate & Silicone Free.

Fraser Essentials Lightweight Oval Pin Brush: this brush is the best I've ever used! It glides through the coat but never pulls or breaks the hair. It's great for removing a small tangle and is actually lightweight! This brush only weighs 61 grams or 2.15 ounces!! It is a Beechwood wooden handle brush with Stainless Steel pins embedded securely in a soft well anchored cushion. One of my favorite products in the entire Fraser Essentials line.

Fraser Essentials Medium Heritage Comb: we can't say enough about this unique comb! The 25mm Stainless Steel teeth ensure the comb will get to the root of the hair. The wider handle ensures easier use than traditional metal spine combs, especially for those with hand/finger issues. It is a must have product for every Papillon owner; perfect to use after a bath before blow drying and to remove any small tangles between baths. The Stainless Steel teeth with rounded ends ensure the comb glides through the coat and is both kind to coat and skin.

Fraser Essentials Melt Matts Away Detangling Spray: a product rich in Vitamin B5 and Panthenol. It is primarily a detangler but will also strengthen and improve elasticity in the coat. The Panthenol is a natural ingredient that attracts moisture while the B5 assists in moisturizing the coat and helping to prevent future matts. This spray should be used to remove matts while our Brushing Spray should be used regularly to prevent future matts.

INSTRUCTIONS: Shake well before using. First, saturate the matts with the Melt Matts Away Spray before brushing. TIP: Give the spray about 2-3 minutes to soak in. Then work the spray into the problem area with your fingers gently pulling apart the knots as much as possible. Finally, start brushing the matts out with our pin brush and finish with a run through with a comb to make sure there are no knots left. TIP: Patience is definitely a virtue working through the matts.
